

# Outdoor Monolith Totem, Fully Glazed

## Outdoor Totem System

The Armagard Fully Glazed Outdoor Monolith Totem is a professional looking totem design, ideal for personalised company branding.

Available as an enclosure or a 'complete solution', you can enjoy this unit with a professional high bright LCD display, network media player, and customised 'back-lit' company logo. This unit protects against liquid ingress to IP56/65 industry standards, vandalism, overheating and electricity spikes.

Features Patented,  
Plenum Chamber  
Cooling.

### 32" - 75"

### Aesthetic Design Precision

With edge-to-edge precision, the outdoor monolith totem features a new 'all glass' (fully glazed) frontage, for an aesthetic and glossy finish. The unit also features no visible locks - with access only achievable through a discreet circular opening on the lower compartment.

Aided by gas struts, the upper compartment opens vertically, eliminating any individual lifting load. It locks via the (separate) lower compartment using two unnoticeable key locks.

#### Benefits

- ✓ Compatible with all major high bright screen types, like LG, NEC, Samsung, and Dynascan.
- ✓ A total-solution, outdoor ready and weatherproof - available in your corporate colour scheme.
- ✓ From a trusted supplier with 25 years' experience - a true international company providing solutions on a global basis.
- ✓ Digital menus allow you to quickly change promotional items as needed, throughout the day.

Available in a 32" to 75" size, an Armagard enclosure provides cost effective hardware protection for up to a decade, allowing you to swap, change or upgrade your screens when needed - unlike restrictive and expensive (all-in-one) outdoor displays.

From -30°C to +55°C temperatures, Armagard enclosures can manage airflow, heat, and power, through a management system Armagard calls 'environmental control' (Pg.2).

Environmental control includes a range of interior components such as a microprocessor controller board for fans and heaters, insulation and optional air-conditioning, which work together to maintain the most cost efficient and 'green' operating temperature for your display.

## Air Curtain, Crossflow Fans

Providing a constant flow of ambient air cooling across an installed display, the Armagard Patented Air Curtain reduces surface heat and moisture build-ups, cuts the chances of black spots forming. Meeting telecom operating specifications, blower fans work for a guaranteed 5 years of continuous life.

### Why Choose Armagard?

Delivering environmental protection for over 25 years, Armagard has a solid reputation for producing high quality products, which is why we are trusted by companies like Nestle, Rolls Royce and Wall Mart.

### What Our Customers Say:

"I received my LCD enclosures today - these are fantastic and just what I was looking for! I know my customer will be impressed with these, just as I am.

I'll use these [LCD enclosures] again for sure!"

Thanks for the great service!

### Peace of mind guarantee:

Reliability is built into our products by design which is why all of our enclosures carry a 5 year warranty on mechanical hardware, and up to 5 years on electrical parts (component specific).
